## More than 20 years of experience

AN-ELEC has been leading the market in designing, building and upgrading distribution boards, panel and switchboards.

We are the largest independent panel builder in the northern part of Poland.

Design, construction, installation, startup and maintenance - comprehensive „turnkey” solutions for all projects.

Offering high quality and professional service over the years, we have earned a large group of satisfied clients.

***To serve our clients 24/7, everywhere!***

Our engineering department has expert knowledge in the fields of distribution, switch, and control panels, ranging from standard to custom made dedicated configurations.

We use advance engineering software and A-level suppliers for systems, components, cabinets and automation products that enables us to choose the best, innovative and most suitable solution for your project.

As turn-key provider we have our own fully equipped 525 m<sup>2</sup> workshop where we produce high quality switchgears

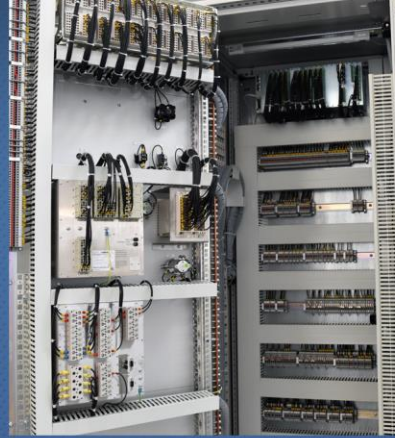

- Main switchboards

- Ventilation switchboards

- Distribution switchboards

- Control / starter panels

- Automation switchboards

Our knowledge, services and comprehensive solutions can be valuable addition in various markets and disciplines:

Energy

Railway

Infrastructure

Commercial buildings

Industry

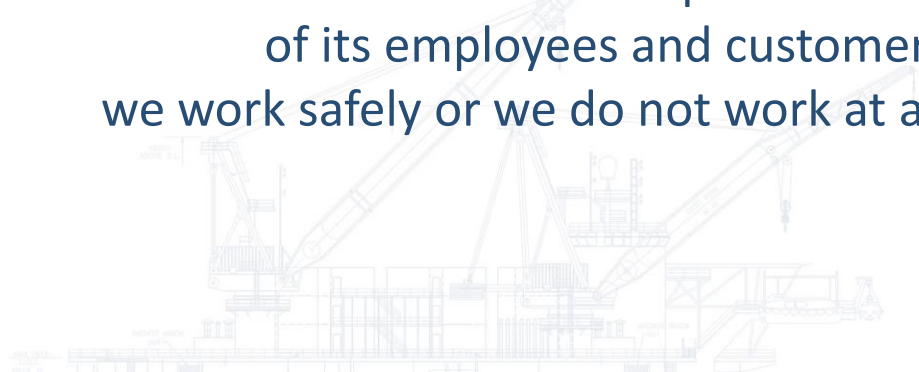

Shipping

## **„Safety first“**

It's a rule that AN-ELEC emphasize to all of its employees and customers, we work safely or we do not work at all.

[illegible]

In order to keep safety and quality on highest level  
we possess certificate.
